DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 and 2, drawn to a cantilever, classified in class 073, subclass 105.
- II. Claims 3 and 4, drawn to a method to manufacture a cantilever, classified in class 29, subclass 595.

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the cantilever of invention 1 can be formed using a process where the conductive wiring is formed by doping, and/or etching and CVD after the tip has been formed. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
